

**\$184,100**

**2014 TOTAL REVENUE**

Corporate	\$5,000
Individuals	\$20,600
Government /Other	\$53,000
Foundations	\$90,000
Revenue	\$15,500

**2014 TOTAL EXPENSES**

**\$169,500**

Administrative Personnel	\$38,000
Administrative Expenses	\$18,500
Educational Program	\$100,000
Workshop Expenses	\$13,000

**LOOKING AHEAD**

We have tremendous plans for 2015. Be on the lookout for more Professional Development workshops, new teaching modules, and expansion of our middle school program. Regular updates will be in our newsletters, on our website and through our social media platforms.

And as we strive to do even more, we appreciate your partnership in this effort. If you agree that the work we do is valuable, please contribute to the BioBuilder Educational Foundation!

Your gift of \$10, \$20, \$50, \$100, or any amount will have a great impact. Make a secure, online donation today <http://biobuilder.org/donate/>

Thank you so much for your support!  
(Students and educators nationwide thank you too.)

# BIOBUILDER IS MAKING AN IMPACT IN CLASSROOMS ACROSS THE COUNTRY

## DEAR FRIENDS

As I reflect on BioBuilder's 2013-2014 fiscal year, it's hard to believe how much we've been able to do in such a short amount of time. We have a growing number of supporters, a thriving community of teachers, students and volunteers, and great new content. You can't help but feel like BioBuilder is taking off! Look at the new website or our distribution partnerships. Look at our teacher leaders, our after-school clubs or the number of countries around the world now requesting our materials. Our impact is being felt far and wide. Much of this growth is made possible due to the contributions of our volunteers. BioBuilder volunteers are doing incredible work—from their positions on our Board to their content contributions. They do more than fill in the blanks. Volunteers sustain us.

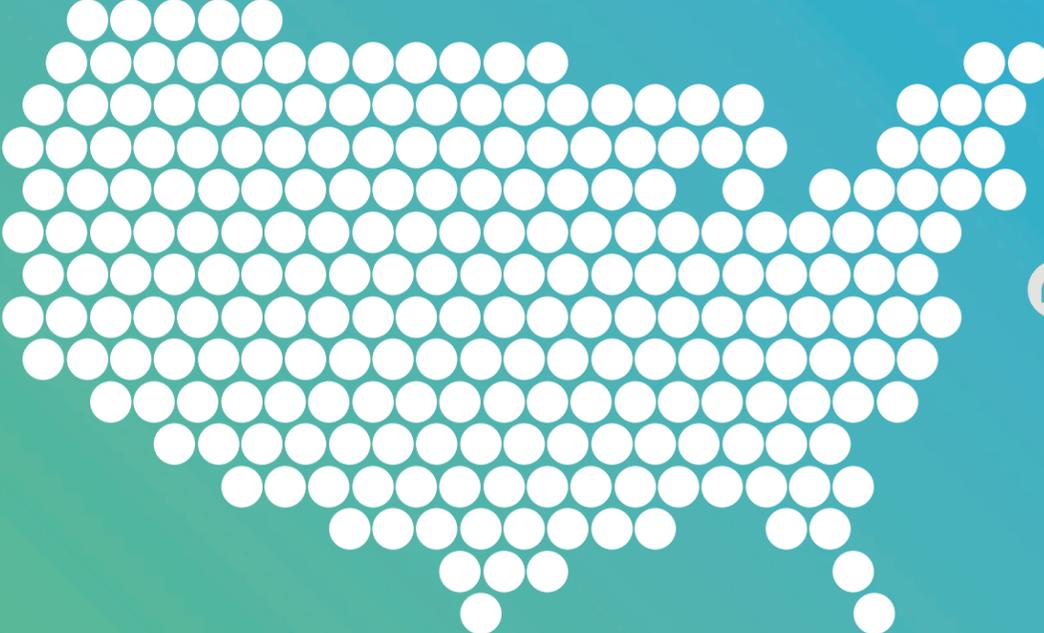

BioBuilder's Leadership Summit was a highlight of the last 12 months. Sponsored by MIT's Department of Biological Engineering and the NSF, our teacher ambassadors from around the country gave two and a half days of their time to build even more momentum around our efforts. These Master BioBuilders left the Summit invigorated with new resources and bold agendas. One teacher told me that we've put the wind in her sails for the new school year and beyond, and when she said it, I thought: that is how we're succeeding, by supporting these teachers and students whose ambitions are to change the world – starting in their classroom, their school and their local community.

I hope you enjoy this overview of what we've done in the past year. With your partnership and support in the upcoming year, we'll be adding still more power to their sails.

Sincerely,  
  
Natalie Kuldell  
President, The BioBuilder  
Educational Foundation

BIOBUILDER  
STATES\*

“ I am really seeing students begin to think and understand cells better- though its just anecdotal evidence, I thought I would share my appreciation for what biobuilder has let me do in the classroom.”  
*High School Teacher*

## NUMBER OF BIOBUILDER TEACHERS

**436**  
IN THE COUNTRY

TOTAL  
**457**

“ My teaching and career for that matter are so much better and more meaningful because of the work that you have put into BioBuilder.”  
*High School teacher*

“ What a great way to end the term. The students thought it was super cool. Numerous students asked me about additional projects to build and model using the software. I encouraged them to check out the BioBuilder website to get some design project ideas.”  
*College Teacher*

“ [I was] in need of rejuvenation, a challenge, and support - all of which you and the incredible BioBuilder family have provided. I understand first hand how much effort and work, even though it is a passion and love, professional development takes to put on. Please know how much your work is appreciated.”  
*Middle School teacher*
